We help put a check on the opioid epidemic.

Our goal is the safe and effective use of opioids for the treatment of pain.

We support patients and providers with 24/7 monitoring to enhance prescriber compliance and patient safety.

Monitor Patients
Engage patient via mobile app
Track vitals, function and behavior

Providers Comply
OPOS compliance report meets regulatory requirements

AI to Intervene
Predict patients at-risk based on functional/behavioral markers

116
Millions of Americans suffering from chronic pain.

30
Millions of patients on chronic opioid therapy.

12
Millions of seniors on chronic opioid therapy.

70%
Decrease from last year of practices accepting opioid patients.

IN 2018
49.5 M PEOPLE FILLED AN OPIOID PRESCRIPTION

50% Percentage of opioids that are prescribed by primary care.

- Quality of Life is functional, determined by what you can do: sleep, walk, work, etc.
- Maximizing function is the most important health outcome.
- Monitoring function is the only way to improve care and safety.
- Monitoring sleep needs to be gold standard PSG-Level.
- PCPs and specialists can only assess patients ~3-4 hrs per year.
- OPOS-Fullpower provides 24/7 of functional monitoring and engagement.

Opioid Prescribing Guideline Compliance

Centers for Disease Control and Prevention
Federal Regulations
State Regulations
State Medical Boards
