## **Subsequent Events & Operational Trends**

- The Company is providing a summary of select July operating metrics in response to economic challenges and related government actions and regulations as a result of the ongoing novel Coronavirus ("COVID-19") pandemic:
  - Through July's accounting month end, combined, rent cash collections and payment plans under lease amendments signed by residents financially impacted by COVID-19 represented 99.1% of billed rent for July 2020. This compares to 99.8% average cash collections in 2019. Rent cash collections represented 97.9% of billed July 2020 rent and promises to pay by financially impacted residents under lease amendments represented 1.2% of billed July 2020 rent.
  - Average Physical Occupancy for the Same Store Portfolio was strong at 95.0% for July 2020, while resident retention was 53.7% for the month.
- COVID-19 has resulted in cessation, severe curtailment, or impairment of business activities in most sectors of the economy in all markets we operate in, due to governmental "stay at home" orders, risk mitigation procedures, closure of businesses not considered to be "essential," as well as other direct and indirect impacts, including those that may not yet be identified. This has resulted in a rapid and dramatic increase in unemployment in the U.S. We cannot estimate the extent of COVID-19's future negative impacts or how long the negative impacts of COVID-19 will persist. In addition, it is possible that, even after the initial restrictions due to COVID-19 ease, they could be reinstituted in case of future waves of infection or if additional pandemics occur. As a result of these uncertainties related to COVID-19, the Company continues to withhold its full-year 2020 guidance outlook.

(1) Interest expense obligations includes the impact of expected settlements on interest rate swaps which have been entered into in order to fix the interest rate on the hedged portion of our floating rate debt obligations. As of June 30, 2020, we had entered into 13 interest rate swap transactions with a combined notional amount of \$1.2 billion. We have allocated the total impact of expected settlements on the \$1.2 billion notional amount of interest rate swaps to 'Operating Properties Mortgage Debt.' We used one-month LIBOR as of June 30, 2020 to determine our expected settlements through the terms of the interest rate swaps.

(2) The Company has the option to extend the maturity date of the Corporate Credit Facility to January 28, 2022, subject to satisfaction of certain extension conditions. As of June 30, 2020, the Company believes it was in compliance with each of the conditions required to be satisfied for extending the maturity date of the credit facility.

(1) As of June 30, 2020, we had total indebtedness of \$1.4 billion at an adjusted weighted average interest rate of 3.01%, of which \$1.3 billion was debt with a floating interest rate. As of June 30, 2020, interest rate swap agreements effectively covered 100% of our \$1.1 billion of floating rate mortgage debt outstanding and 38.4% of our \$225.0 million floating rate credit facility. For purposes of calculating the adjusted weighted average interest rate of the total indebtedness, we have included the weighted average fixed rate of 1.3792% for one-month LIBOR on the \$1.2 billion notional amount of interest rate swap agreements that we have entered into as of June 30, 2020, which effectively fix the interest rate on \$1.2 billion of our floating rate debt outstanding.

## **Definitions and Reconciliations of Non-GAAP Measures**

## Definitions

This presentation contains non-GAAP financial measures. A "non-GAAP financial measure" is defined as a numerical measure of a company's financial performance that excludes or includes amounts so as to be different than the most directly comparable measure calculated and presented in accordance with GAAP in the statements of income, balance sheets or statements of cash flows of the Company. The non-GAAP financial measures used within this presentation are net operating income ("NOI"), funds from operations attributable to common stockholders ("FFO"), FFO per diluted share, Core FFO, Core FFO per diluted share, adjusted FFO ("AFFO"), AFFO per diluted share and net debt.

NOI is used by investors and our management to evaluate and compare the performance of our properties to other comparable properties, to determine trends in earnings and to compute the fair value of our properties. NOI is calculated by adjusting net income (loss) to add back (1) the cost of funds, (2) acquisition costs, (3) advisory and administrative fees, (4) the impact of depreciation and amortization expenses as well as gains or losses from the sale of operating real estate assets that are included in net income computed in accordance with GAAP, (5) corporate general and administrative expenses, (6) other gains and losses that are specific to us, (7) casualty-related expenses/(recoveries) and casualty gain (loss), (8) miscellaneous income derived from recognition of lost rents covered by insurance, (9) pandemic expenses and (10) property general and administrative expenses that are not reflective of the continuing operations of the properties or are incurred on behalf of the Company at the property for expenses such as legal, professional and franchise tax fees. We define "Same Store NOI" as NOI for our properties because it allows us to compare operating results of properties owned for the entirety of the current and comparable periods and therefore eliminates variations caused by acquisitions or dispositions during the periods.

FFO is defined by the National Association of Real Estate Investment Trusts ("NAREIT"), as net income (loss) computed in accordance with GAAP, excluding gains or losses from real estate dispositions, plus real estate depreciation and amortization. We compute FFO in accordance with NAREIT's definition. Our presentation differs slightly in that we begin with net income (loss) before adjusting for amounts attributable to redeemable noncontrolling interests in the OP and we show the combined amounts attributable to such noncontrolling interests as an adjustment to arrive at FFO attributable to common stockholders.

Core FFO makes certain adjustments to FFO, which are either not likely to occur on a regular basis or are otherwise not representative of the ongoing operating performance of our Portfolio. Core FFO adjusts FFO to remove items such as losses on extinguishment of debt and modification costs (includes prepayment penalties and defeasance costs incurred and the write-off of unamortized deferred financing costs and fair market value adjustments of assumed debt related to the retirement of debt and costs incurred in connection with a debt modification that are expensed), casualty-related expenses/recoveries, casualty gains or losses, pandemic expenses, the amortization of deferred financing costs incurred in connection with obtaining short-term debt financing and the noncontrolling interests related to these items.

AFFO makes certain adjustments to Core FFO. There is no industry standard definition of AFFO and practice is divergent across the industry. AFFO adjusts Core FFO to remove items such as equity-based compensation expense and the amortization of deferred financing costs incurred in connection with obtaining long-term debt financing, and the noncontrolling interests related to these items.

Net debt is calculated by subtracting cash and cash equivalents and restricted cash held for value-add upgrades and green improvements from total debt outstanding.

We believe that the use of NOI, FFO, Core FFO, AFFO and net debt, combined with the required GAAP presentations, improves the understanding of operating results and debt levels of real estate investment trusts ("REITs") among investors and makes comparisons of operating results and debt levels among such companies more meaningful. While NOI, FFO, Core FFO, AFFO and net debt are relevant and widely used measures of operating performance and debt levels of REITs, they do not represent cash flows from operations, net income (loss) or total debt as defined by GAAP and should not be considered an alternative to those measures in evaluating our liquidity, operating performance and debt levels. NOI, FFO, Core FFO and AFFO do not purport to be indicative of cash available to fund our future cash requirements. We present net debt because we believe it provides our investors a better understanding of our leverage ratio. Net debt should not be considered an alternative to total debt, as we may not always be able to use our available cash to repay debt. Our computation of NOI, FFO, Core FFO, AFFO and net debt may not be comparable to NOI, FFO, Core FFO, AFFO and net debt reported by other REITs. For a more complete discussion of NOI, FFO, Core FFO and AFFO, see our most recent Annual Report on Form 10-K and our other filings with the SEC.
