50%

**Decrease in Missed Calls**

**What's a missed call worth?**  
That depends. Some estimates put it as high as \$200, given the chance that it is a potential new lifelong patient.

One 25 location dental service organization using Weave **decreased their missed call rate across locations from over 13% to under 6%.**

20+

**Staff Hours Saved Per Location**

Automated SMS and email-based recall, appointment reminders, and appointment confirmations mean staff can spend more time building schedules and providing a better patient experience.

**With Weave Unify, automation can be customized per location, or standardized across your business.**

100+

**Yearly Increase in Google Reviews**

**Google is the #1 place where people find new businesses and new practices.** Without many reviews, you'll look like a ghost town.

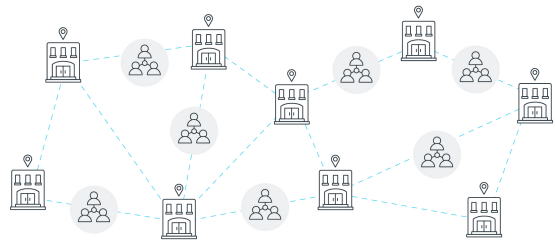

Practices that use Weave to solicit patient reviews (manually or automatically) often add more than 100 Google Reviews per year, solidifying their 5-star rating.

How are you collecting outstanding balances? If you're mailing out invoices without giving patients the opportunity to pay via SMS first, you're burning budget on unnecessary operations expenses.

**When you collect payments via SMS through Weave, you can skip the cost of envelopes, stamps, and printing invoices.**

\$200/Mo

**Savings on Payment Collection**

Weave Unify combines robust, multi-location VoIP-based phone service with patient engagement software, empowering offices within a multi-location business to leverage each others' patient databases, schedules, and call handling staff to streamline communications, fill schedules across a group of practices, and provide a consistently fantastic patient experience.
