

Climate change is putting food production at risk. The way we farm and produce food can make a positive difference - and be a key solution.

PepsiCo's Positive Agriculture Ambition Aims to Deliver Impact for the Planet & People by 2030

100%

sustainably sourced
key ingredients

7 million

acres of land farmed
with regenerative
farming practices*

Estimated at
least 3 million
tons GHG
emissions
reduced

Approximately
the size of our
agricultural
footprint

*A set of practices that improve and restore ecosystems

250,000+

livelihoods improved
in our agricultural
supply chain

Healthy soil grows sustainable ingredients, which improve livelihoods

WE WILL TRACK OUR PROGRESS TOWARD THESE
GOALS, MAKING A MEASURABLE IMPACT IN:

Building soil
health and fertility

Sequestering carbon
and reducing emissions

Enriching
watershed health

Protecting and
enhancing biodiversity

Improving farmer
livelihoods
