

At Upfield, we're working to measure and reduce our methane emissions.

Upfield's Total GHG Footprint:
3.154 million
metric tonnes CO₂-eq

7.5%

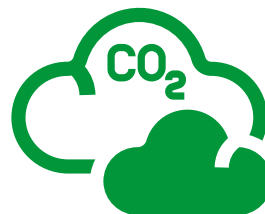

of our total greenhouse gas footprint is methane — more than our total scope one and two emissions combined

Upfield's Methane Footprint:
0.237 million
metric tonnes CO₂-eq

And our analysis shows that dairy has a disproportionate impact on our climate footprint.

Dairy is responsible for 8% of our total climate footprint ...

8%

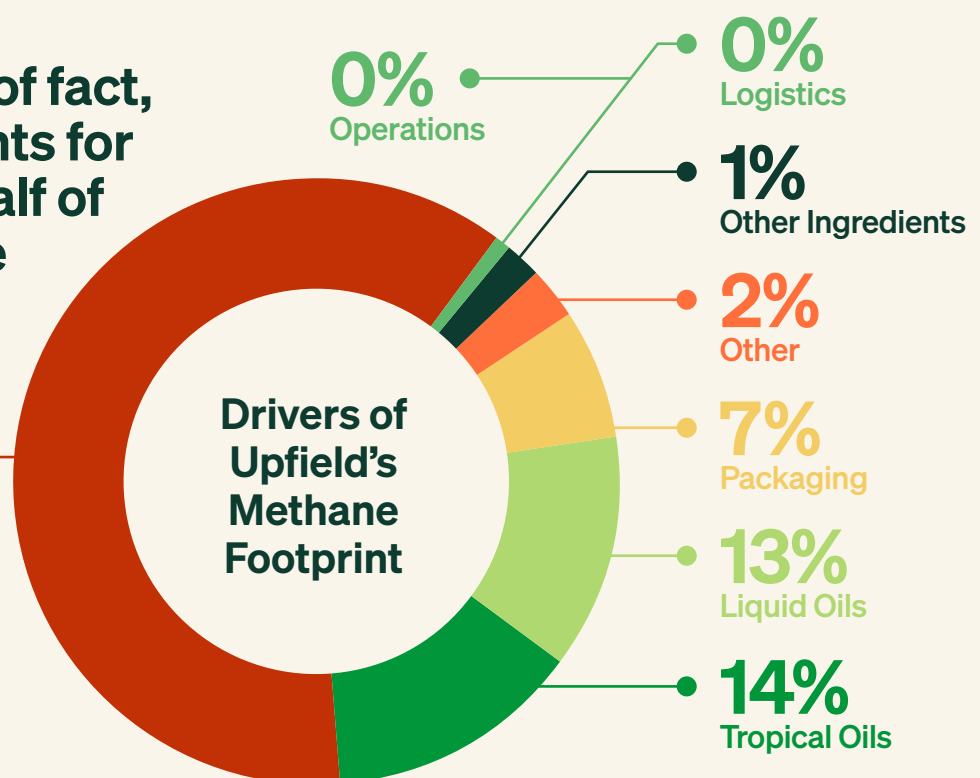

1%

...Even though dairy makes up just 1% of our total ingredients by volume.

As a matter of fact, dairy accounts for more than half of our methane emissions.

63%
Dairy
Ingredients

It's why we're targeting to eliminate dairy from our global supply chains.
