# DP OMNI™

## ADVANCED BATTERY SOLUTION

### ENABLING TECHNOLOGIES

- High-performance lithium-ion cells.
- Intelligent battery management systems.
- Applicable in all-weather conditions and seasons.
- Suitable for heavy-duty load cycles.

### Dimensions

1065 x 630 x 245 mm

### Current

250A based on MSD rating

### Weight

~ 230kg

### Energy Density

More than 162Wh/kg

### WHY DP OMNI™?

- Lightweight design with no compromise on structural integrity.
- Thermal Management: Integrated cooling plate in base and Positive Temperature Coefficient (PTC) heating element.
- The pack is in compliance with IP67 requirements.
- Design ready for second-life deployment.
- Design upgradable to new chemistries and higher energy densities.
- Compatible with LFP chemistry.
- Digital Connectivity Enabled.
