

Cooler Master Launches the Dyn X: A New Frontier in Racing Simulation

One adjustment offers 14 different driving positions

TAIPEI, TAIWAN, August 28, 2023 – Cooler Master, a leading innovator in PC Hardware, today announced the launch of Dyn X, a breakthrough product for virtual racing and flying simulations. The Dyn X is more than a simulator; it's a gateway to a whole new world of adventures.

"Cooler Master has always been at the forefront of innovation, and the Dyn X is a testament to our unwavering commitment to elevating gaming experiences," said Jimmy Sha, CEO of Cooler Master. "Whether you're taking on a new racetrack or taking flight, the Dyn X offers unprecedented customization, comfort, and immersive gameplay."

The Dyn X consists of two main components: a racing seat and a cockpit. Both are designed using high-quality materials, feature universal compatibility, and adopt modern race-inspired aesthetics. The Dyn X provides users with the opportunity to craft a simulation environment that aligns perfectly with their preferences.

THE DYN X COCKPIT

At the core of the system is the Dyn X Cockpit, developed with the most passionate virtual racers in mind. It enables you to adapt your driving position to different racing scenarios effortlessly. One single adjustment offers 14 different driving positions, catering to a variety of racing styles, including Formula, GT, NASCAR, Rally, Trophy Truck, Semi Truck, and more.

The Dyn X Cockpit is not just versatile, but easy to assemble and compatible with a wide variety of racing accessories. The robust tubular steel construction assures unparalleled durability and stability. The future-proof modular design provides numerous attachment points, allowing users to install monitors, shifters, motion systems, and more as per their needs.

THE DYN X RACING SEAT

The Dyn X Racing Seat is the perfect companion for the cockpit and provides optimal comfort and support for different driving positions. It features a fiberglass composite shell for unmatched rigidity, and premium synthetic suede leather finishing for a luxurious feel.

The Dyn X Racing Seat also comes with interchangeable cushion covers in black, red, or blue, allowing users to customize their simulation environment to match their preferences. The seat's ergonomic design promises extended comfort, even during prolonged use. Its detachable and adjustable headrest guarantees a personalized and comfortable experience with every driving position.

READY FOR TAKE OFF?

The Dyn X transcends the boundaries of racing simulation and can morph into a comprehensive flight simulator, easily adjusting to every seating position from Cessnas to gliders.

The Dyn X is a testament to Cooler Master's innovation and commitment to delivering high-quality professional simulation technology. It embodies the company's vision to create immersive and tailored experiences, positioning Cooler Master as a trailblazer in user-focused design in the professional simulation industry.
