What we'll do

- Contextually-mapped and strategically-built around your specific threat profile to enable swift identification and resolution.

- Logical and pragmatic approach to solution adoption and deployment, helping your business to navigate the complexities of security.

- Provide clear visibility of your solution functions and any risks we might encounter along the way.

- End-to-end solution that is based on outcomes and not outputs. Understanding your security needs, designing tailored services and our experts managing them.

Business is everywhere. Security should be too.

Your business needs to be secure.

Your business needs to be secure. To help safeguard your data, people, business and reputation, Telstra International offers multi-layered, modular security services designed to meet the Confidentiality, Integrity and Availability (CIA) principles.

Our experts can help optimise your security posture to satisfy industry compliance, customers and shareholders, and protect your business from cyberattacks, whether they're introduced by people, through your network, or your external operating environment.

Why Telstra International?

Expertise and Experience
Our deep experience and knowledge of security frameworks such as NIST, GDPR and SOC 2 enable us in implementing robust and effective solutions that align with your industry, compliance requirements, and risk management objectives.

Strong Alliance Ecosystem
We bring the strengths of our partner alliances with major global technology leaders in our ecosystem to support you.

Proven Consulting Methodology
Our Telstra Purple "4D" Consulting Methodology has helped many global customers to strengthen their security posture.

ISO/IEC 27001 Certified
Our technology, delivery and support processes are certified to the ISO 27001 Information Security Management standard.
