Revelation Auctions Set to Host 10+ Online Equipment Auctions in Late 2023

Chicago, IL - As an industrial equipment auctioneer with over 270 years combined experience in auctions, metalworking, process, plastics, and packaging equipment, Revelation Auctions is gearing up for a busy auction season in the last few months of 2023.

The company will be hosting a minimum of [13 industrial equipment auctions online](#) in October, November, and December 2023 and there's no plans to slow down next year, with used equipment auctions already scheduled for January 2024.

Buyers looking for top-tier machinery with proven reliability from top brands will experience a diverse selection of used CNC, fabrication, process, packaging, and plastic equipment at competitive prices at each of the [upcoming equipment auctions](#). "We want to ensure buyers not only walk away satisfied with their deals, but that they've had a positive experience from start to finish," said David Marban, Vice President of Asset Management at Revelation Auctions. "Our team of licensed auctioneers is looking forward to providing expert guidance and support to those looking for used equipment from top brands. Whether that's answering questions, offering insights, or assisting buyers in making informed decisions, we pride ourselves on creating a seamless experience in every auction we host."

Buyers can expect a wide variety of used equipment from reputable brands including Haas, Okuma, Amada, Mazak, Cincinnati, Trumpf, Giddings & Lewis, Toshiba, Samsung, Hyundai, and many more. Upcoming industrial equipment auctions will include machinery from CNC machine shops, fabrication facilities, packaging facilities, Minster stamping press facilities, major lubricant and fuel additive suppliers, and a number of manufacturers including metals, high precision guns, battery and nitrogen fuel cells, polymers, and private labels.

[Used equipment for sale](#) at auction will include press brakes, lasers, machining centers, VMCs, shears, turning centers, lathes, waterjets, stamping presses, forklifts, turrets, industrial ovens, paint booths, grinders, bandsaws, plasma tables, twin screw extruders, underwater pelletizers, blow molding equipment, grinders, gravity fillers, drum pumps, labelers, material handling, palletizing, and filling equipment, uncoilers, straighteners, feeders, welding equipment, robotic equipment, automated inspection machines, engine production tools, tooling, and so much more.
