

FOR IMMEDIATE RELEASE

ATS LIFE SCIENCES SYSTEMS AND STAUBLI ROBOTICS COLLABORATE TO DEVELOP A MULTI-MILLION-DOLLAR END-TO-END SYRINGE MANUFACTURING SYSTEM

Staubli Robotics Continues to Support ATS Life Sciences Systems with Upcoming Robotic Syringe Assembly.

(L toR) David Lecordier, Application Engineer, Staubli Robotics | Brandon Cole, Business Development and Strategic Planning Manager - Sales, ATS Corporation
Troy Mueller, Business Development (Pharma) Staubli Robotics | Olivier Cremoux, Local Head of Pharma & Medical Device N.A., Staubli Robotics

(Cambridge, Ontario – November 2023) The ATS Life Sciences Systems engineering team, leveraging the power of Staubli Robotics capabilities, has been selected to build a large-scale syringe assembly system in the eastern United States. The system will span from the molding systems to the end-of-line pack-out, resulting in a highly efficient and reliable system consistently delivering quality and performance.

The collaboration between ATS Life Sciences Systems (LSS) and Staubli Robotics combines the expertise of two industry leaders to deliver innovative solutions tailored to meet the unique needs of customers, in this case a 300 parts-per-minute, end-to-end syringe assembly system. The system is built on ATS LSS' high-performance assembly platform and incorporates Staubli Robotics' advanced technology, featuring eight Staubli robots employed in various operations, including mold unloading, siliconization, tip capping, and robust quality and visual inspections.

Olivier Cremoux leads the North American Sales and Marketing team for Staubli Pharma and Med Devices, based in Duncan, South Carolina. He states, *"Staubli and ATS LSS have established a strategic partnership to develop high-end automation projects for the pharma and medical industry. While our companies have collaborated for years, creating state-of-the-art automated solutions for device manufacturing and drug compounding, we are reaching a new milestone with this great success."*

Andy Glaser, VP of Global Sales at ATS Life Sciences Systems, comments, *"By harnessing the expertise of industry leaders like Staubli and pairing them with the innovative solutions that ATS LSS has become known for, we address our unique customer challenges and continue to drive innovative solutions which fundamentally tackles the market demand for medical devices."*

ATS Strategic Partners

This syringe assembly system is just one example of the innovative solutions that ATS LSS and Staubli Robotics, working together strategically, can deliver. Their depth and breadth of expertise make them ideal partners for developing this 300-syringe-per-minute fully automated solution.

About ATS Life Sciences Systems

ATS is an industry-leading automation solutions provider to many of the world's most successful companies. ATS uses its extensive knowledge base and global capabilities in custom automation, repeat automation, automation products and value-added services, including pre-automation and after-sales services, to address the sophisticated manufacturing automation systems and service needs of multinational customers in a wide array of markets including life sciences. With over 26,000 systems built and maintained globally, ATS Life Sciences Systems is committed to providing its customers with the highest-quality automation solutions.

About Staubli Robotics

Headquartered in Switzerland, with four satellite offices in North America, Staubli Robotics is a recognized global leader in robotic systems, with more than 30 years' experience in the life sciences space and with aseptic applications. Staubli has deployed over 10,000 robots in the life sciences space and has a global team with over 200 employees dedicated to this industry.
