## NEWS RELEASE

# AFRICA OIL ANNOUNCES ITS YEAR-END 2023 STATEMENT OF RESERVES

**February 26, 2024 (AOI-TSX, AOI-Nasdaq-Stockholm) – Africa Oil Corp.** (“Africa Oil”, “AOC” or the “Company”) announces the posting of its 2023 statement of reserves on SEDAR ([www.sedar.com](http://www.sedar.com)) as part of its Annual Information Form. This disclosure is based on an independent reserves evaluation, effective 31 December 2023, prepared by RISC (UK) Limited (“RISC”) for Africa Oil in accordance with Canadian National Instrument 51-101 – Standards for Oil and Gas Activities (“NI 51-101”) and the Canadian Oil and Gas Evaluation Handbook (“COGE Handbook”). Africa Oil’s statement of reserves is based on the Company’s 50% ownership interest in Prime Oil & Gas Coöperatief U.A (“Prime”).

### Highlights<sup>1</sup>

- Year-end (“YE”) 2023 reserves determination has resulted in a small increase in the after-tax Proved reserves (“1P”) NPV(10) valuation of \$722 million (YE’22: \$714 million)<sup>2</sup>. The increase in 1P reserves valuation is net of total dividend payments of \$175 million by Prime to Africa Oil during 2023.
- YE’23 reserves determination has delivered an after-tax Proved plus Probable reserves (“2P”) NPV(10) valuation of \$1,192 million (YE’22: \$1,232 million)<sup>2</sup>. The change in 2P reserves valuation is net of total dividend payments of \$175 million by Prime to Africa Oil during 2023.
- YE’23 working interest (“W.I.”) and net entitlement<sup>3</sup> 1P reserves of 29.9 MMboe (YE’22: 34.6 MMboe) and 35.6 MMboe (YE’22: 41.3 MMboe), respectively.
- YE’23 W.I. and net entitlement 2P reserves of 52.2 MMboe (YE’22: 55.6 MMboe) and 59.6 MMboe (YE’22: 63.9 MMboe), respectively.

**Africa Oil Chief Executive Officer, Dr Roger Tucker, commented on the statement of reserves:** “I am pleased to report robust year-end 2023 reserves for Africa Oil. Our assets offshore Nigeria have performed in line with our expectation and continue to provide us with significant high netback production. Furthermore, with the renewal of OML 130 and the anticipated renewal of OML 127, both for 20 years, these assets will provide Africa Oil with long life reserves in three of Nigeria’s top producing assets. There is also considerable scope for low-risk, high-return investment opportunities in the license areas, such as the Preowei development project, that will support production in the coming years.”

Africa Oil’s statement of reserves is based on the Company’s 50% ownership interest in Prime Oil & Gas Coöperatief U.A (“Prime”). Prime’s main assets are an indirect 8% interest in Oil Mining Lease (“OML”) 127 and an indirect 16% interest in OML 130<sup>4</sup>; both are deep-water Nigeria concessions. OML 127 is operated by the affiliates of Chevron Corporation and contains the producing Agbami field. OML 130<sup>4</sup> is operated by affiliates of TotalEnergies SE and contains the producing Akpo and Egina fields and the undeveloped Preowei field.

### Notes:

- 1 Please refer to the oil and gas advisory on page 4 for important information.
- 2 Based on Brent oil price forecast of (\$/bbl): 2024 - \$82.0; 2025 - \$78.0; 2026 - \$78.8; 2027 - \$80.8; 2028 - 82.8; 2029 and beyond escalation rate of 2.5%.
- 3 Net entitlement reserves are calculated using the economic interest methodology and include cost recovery oil, tax oil and profit oil and are different from working interest reserves that are calculated based on project volumes multiplied by Prime’s effective working interest.
- 4 Renewal of the rights under OML 130 in 2023 resulted in the award of three new production leases and one prospecting license. These cover some of the areas previously covered by OML 130, with some of the areas also relinquished. These are PML 2 (Akpo field), PML 3 (Egina), PML 4 (Preowei) and PPL 261 (South Egina).
- 5 All dollar amounts in this press release are U.S. Dollars unless otherwise indicated.

The YE'23 reserves and reconciliation of changes in W.I. reserves summarized in the following tables pertain to 50% of Prime's W.I. and net entitlement reserves:

Summary of Oil and Gas Reserves (Forecast Prices and Costs)						
	Light and Medium Oil		Conventional Natural Gas		Natural Gas Liquids	
Reserve Category	Gross (MMstb)	Net (MMstb)	Gross (Bcf)	Net (Bcf)	Gross (MMstb)	Net (MMstb)
<b>Proved</b>						
Developed Producing	15.6	19.9	9.2	9.2	-	-
Developed Non-Producing	-	-	-	-	-	-
Undeveloped	10.0	11.5	15.6	15.6	-	-
<b>Total Proved</b>	<b>25.7</b>	<b>31.4</b>	<b>24.9</b>	<b>24.9</b>	<b>-</b>	<b>-</b>
<b>Probable</b>	18.0	19.6	26.4	26.4	-	-
<b>Total Proved plus Probable</b>	<b>43.6</b>	<b>51.0</b>	<b>51.3</b>	<b>51.3</b>	<b>-</b>	<b>-</b>
<b>Possible</b>	16.0	16.2	32.3	32.3	-	-
<b>Total Proved plus Probable plus Possible</b>	<b>59.6</b>	<b>67.2</b>	<b>83.6</b>	<b>83.6</b>	<b>-</b>	<b>-</b>
<i>Notes</i>						
<ol style="list-style-type: none"> <li>1. Figures in table may not add precisely due to rounding errors.</li> <li>2. Units are MMstb (million stock tank barrels) and Bcf (billion cubic feet).</li> <li>3. Gross Company reserves are the total project sales volumes multiplied by Company's working interest.</li> <li>4. Net oil reserves are Company's net entitlement calculated using economic limit testing.</li> <li>5. Gross and net reserves for sales gas are equal as the gas terms are set out in the Gas Sales and Purchase Agreement rather than the Production Sharing Agreement ("PSA"), and the net reserves are based on Company's working interest.</li> </ol>						

W.I. reserves are lower than the previous year primarily due to W.I. production of 7.2 MMboe, which was offset by upwards technical and economic revisions of 2.3MMboe of Proved plus 1.3MMboe of Probable Reserves. The technical revisions were as a result of improved performance at Agbami and the maturation of contingent gas resources to developed resources at Akpo.

The following table provides a reconciliation between the Gross W.I. Reserves disclosed on the 27 February 2023 (effective date 31 December, 2022) and this disclosure (effective date 31 December, 2023).

Gross	Light and Medium Oil (MMstb)			Conventional Natural Gas (Bscf)		
	Proved	Probable	Proved + Probable	Proved	Probable	Proved + Probable
Effective date 31 December 2022	29.1	18.3	47.4	32.9	16.5	49.4
Extensions and Improved Recovery	0.0	0.0	0.0	0.0	0.0	0.0
Resource Transfers	0.0	0.0	0.0	0.0	0.0	0.0
Technical Revisions	1.9	-0.2	1.8	1.4	10.1	11.5
Discoveries	0.0	0.0	0.0	0.0	0.0	0.0
Acquisitions	0.0	0.0	0.0	0.0	0.0	0.0
Dispositions	0.0	0.0	0.0	0.0	0.0	0.0
Economic Factors	0.2	-0.2	0.1	0.1	-0.1	0.0
Production	5.6	0.0	5.6	9.5	0.0	9.5
<b>Effective date 31 December 2023</b>	<b>25.7</b>	<b>18.0</b>	<b>43.6</b>	<b>24.9</b>	<b>26.4</b>	<b>51.3</b>

Notes:

1. Figures in table may not add precisely due to rounding.
2. Gross Company Reserves are the total project sales volumes multiplied by AOC's share of Prime's working interest.
3. RISC notes that the Proved + Probable Reserves reconciliation for oil and gas is lower than the Proved in some categories. This results in a negative Probable increment. The difference is due to a larger increase in Proved Reserves than the Proved + Probable, compared to last year.

### About Africa Oil

Africa Oil Corp. is a Canadian oil and gas company with producing and development assets in deepwater Nigeria and an exploration/appraisal portfolio in West and South of Africa, as well as Guyana. The Company is listed on the Toronto Stock Exchange and on Nasdaq Stockholm under the symbol "AOI". For further information, please contact:

Shahin Amini  
Head of Investor Relations

### Additional Information

This information is information that Africa Oil is obliged to make public pursuant to the EU Market Abuse Regulation. The information was submitted for publication, through the agency of the contact persons set out above, at 6:30 p.m. ET on February 26, 2024.

## Advisory Regarding Oil and Gas Information

The terms boe (barrel of oil equivalent) and MMboe (millions of barrels of oil equivalent) are used throughout this press release. Such terms may be misleading, particularly if used in isolation. Year-end 2023 reserves estimates are based on a conversion ratio of six thousand cubic feet per barrel of oil equivalent (6 Mcf: 1 boe), which is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Given that the value ratio based on the current price of crude oil as compared to natural gas is significantly different from the energy equivalency of 6:1, utilizing a conversion on a 6:1 basis may be misleading as an indication of value.

RISC's report was prepared using Brent oil price forecast of (\$/bbl): 2024 - \$82.0; 2025 - \$78.0; 2026 - \$78.8; 2027 - \$80.8; 2028 - 82.8; 2029 and beyond escalation rate of 2.5%. There is no assurance that the forecast prices will be attained and variances could be material. The recovery and reserves estimates of crude oil, natural gas liquids and natural gas reserves provided herein are estimates only and there is no guarantee that the estimated reserves will be recovered. Actual crude oil, natural gas and natural gas liquids reserves may be greater than or less than the estimates provided herein.

The reserves estimates presented in this press release have been evaluated by RISC in accordance with NI 51-101 and the COGE Handbook, are effective December 31, 2023. The reserves presented herein have been categorized accordance with the reserves and resource definitions as set out in the COGE Handbook. The estimates of reserves in this press release may not reflect the same confidence level as estimates of reserves for all properties, due to the effects of aggregation.

Reserves are estimated remaining quantities of petroleum anticipated to be recoverable from known accumulations, as of a given date, based on the analysis of drilling, geological, geophysical, and engineering data; the use of established technology; and specified economic conditions, which are generally accepted as being reasonable. Reserves are further classified according to the level of certainty associated with the estimates and may be sub-classified based on development and production status. Proved Reserves are those quantities of petroleum, which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible from a given date forward, from known reservoirs and under existing economic conditions, operating methods and government regulations. Probable Reserves are those additional quantities of petroleum that are less certain to be recovered than Proved Reserves, but which, together with Proved Reserves, are as likely as not to be recovered. Possible Reserves are those additional reserves that are less certain to be recovered than probable reserves. It is unlikely that actual remaining quantities recovered will exceed the sum of the estimated proved plus probable plus possible reserves.

## Forward Looking Information

Certain statements and information contained herein constitute "forward-looking information" (within the meaning of applicable Canadian securities legislation). Such statements and information (together, "forward looking statements") relate to future events or the Company's future performance, business prospects or opportunities.

All statements other than statements of historical fact may be forward-looking statements. Statements concerning proven and probable reserves and resource estimates may also be deemed to constitute forward-looking statements and reflect conclusions that are based on certain assumptions that the reserves and resources can be economically exploited. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar expressions) are not statements of historical fact and may be "forward-looking statements". Forward-looking statements involve known and unknown risks, ongoing uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements, including production, cashflow from operation and capital investment estimates, performance of commodity hedges, the results, schedules and costs of exploratory drilling activity, uninsured risks, regulatory and fiscal changes, availability of materials and equipment, unanticipated environmental impacts on operations, duration of the drilling program, availability of third party service providers and defects in title.

Although the Company believes that the expectations reflected by the forward-looking statements presented in this document are reasonable, the Company's forward-looking statements have been based on assumptions and factors concerning future events that may prove to be inaccurate. Those assumptions and factors are based on information currently available to the Company about itself and the businesses in which it operates. Information used in developing forward-looking statements has been acquired from various sources, including third party consultants, suppliers and regulators, among others. Because actual results or outcomes could differ materially from those expressed in any forward-looking statements, investors should not place undue reliance on any such forward-looking statements. By their nature, forward-looking statements involve numerous assumptions, inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predicted outcomes will not occur. Some of these risks, uncertainties and other factors are similar to those faced by other oil and gas companies and some are unique to the Company.

No assurance can be given that these expectations will prove to be correct and such forward-looking statements should not be unduly relied upon. The Company does not intend, and does not assume any obligation, to update these forward-looking statements, except as required by applicable laws. These forward-looking statements involve risks and uncertainties relating to, among other things, changes in macro-economic conditions and their impact on operations, changes in oil prices, reservoir and production facility performance, hedging counterparty contractual performance, results of exploration and development activities, cost overruns, uninsured risks, regulatory and fiscal changes, defects in title, claims and legal proceedings, availability of materials and equipment, availability of skilled personnel, timeliness of government or other regulatory approvals, actual performance of facilities, joint venture partner underperformance, availability of financing on reasonable terms, availability of third party service providers, equipment and processes relative to specifications and expectations and unanticipated environmental, health and safety impacts on operations. Actual results may differ materially from those expressed or implied by such forward-looking statements.

The Company's Annual Information Form for the year ended December 31, 2023 and other documents filed with securities regulatory authorities (accessible through the SEDAR website [www.sedar.com](http://www.sedar.com)) describe risks, material assumptions and other factors that could influence actual results and are incorporated herein by reference.
