Sepsis and Sepsis Alliance

Sepsis is a life-threatening emergency that happens when your body's response to an infection damages vital organs and, often, causes death.

[Click here to learn more about sepsis.](#)

Sepsis Alliance Mission: Save lives and reduce suffering by educating the public and leading an alliance of patients, healthcare professionals, and partners committed to preventing and curing sepsis.

Sepsis Alliance Vision: A world in which nobody is harmed by sepsis.

[Click here to learn more about our mission.](#)

Sepsis Alliance, the first and leading sepsis organization in the U.S., seeks to save lives and reduce suffering by improving sepsis awareness and care. Sepsis is the leading cost of care and cause of death in U.S. hospitals: more than 1.7 million Americans are diagnosed with sepsis each year, and more than 350,000 U.S. adults die from the condition annually. Over 50% of sepsis survivors experience lingering complications, which can include amputations and post-sepsis syndrome.

At Sepsis Alliance's founding in 2003, only 19% of U.S. adults were aware of the term "sepsis." After over ten years of educational efforts for the general public and healthcare professionals through Sepsis.org, Sepsis Alliance Institute, and Sepsis Alliance Voices, awareness is at 63%. Sepsis Alliance is the convener of Sepsis Innovation Collaborative, a multi-stakeholder public/private collaborative dedicated to innovations in sepsis diagnosis and management. Over 30,000 healthcare professionals across the country have attended sepsis webinars and courses to elevate their practice.

[Click here to read more of our story.](#)

Faces of Sepsis™ allows those affected by sepsis to share their experiences of illness, treatment, recovery, and loss. The collected stories aim to capture the diversity of people impacted by sepsis.

[Click here to read Faces of Sepsis.](#)

Sepsis Alliance is a national 501(c)3 organization and a GuideStar Platinum rated charity.

Key Players

Thomas Heymann, MBA | President and CEO

Tom has been part of Sepsis Alliance since 2007, serving as President and CEO since 2013. He has led Sepsis Alliance to consecutive years of growth including the organization's drive to increase sepsis awareness from 19% - 65%.

[Click here for more information.](#)

Savannah Stark | Vice President, Development and Operations

Savannah has been with Sepsis Alliance since 2013, developing and implementing many Sepsis Alliance initiatives including the fundraising and events program.

[Click here for more information.](#)

Steven Q. Simpson, MD | Chair, Board of Directors

Dr. Simpson is a Professor of Medicine at the University of Kansas in the Division of Pulmonary, Critical Care, and Sleep Medicine. He also served as President of the American College of Chest Physicians (CHEST).

[Click here for more information.](#)

Cindy Hou, DO, MA, MBA, CIC, CPHQ, FACOI, FACP, FIDSA | Chief Medical Officer

Dr. Hou is the Infection Control Officer and Medical Director of Research at Jefferson Health – New Jersey and the physician lead for Jefferson Health – New Jersey's Antimicrobial Stewardship Committee, Infection Control Committee, Infection Prevention Task Force, and Sepsis on the Floors Task Force.

[Click here for more information.](#)

Carl Flatley, DDS, MSD | Founder

On April 30, 2002, Carl Flatley's life changed. It was the day his daughter Erin died from septic shock, something he had never heard of. Dr. Flatley went on to start Sepsis Alliance in memory of his daughter.

****Sepsis Alliance also has interview access to sepsis survivors and caregivers, and additional medical professionals from across the continuum of care.**

Sepsis Alliance Brand

You are permitted to include most Sepsis Alliance graphics, without crops or edits, in your media. Please contact Alex Colvin at acolvin@sepsis.org with any requests.

When it comes to sepsis, remember
IT'S ABOUT TIME™. Watch for:

T

I

M

E

TEMPERATURE higher or lower than normal	INFECTION may have signs and symptoms of an infection	MENTAL DECLINE confused, sleepy, difficult to rouse	EXTREMELY ILL severe pain, discomfort, shortness of breath
---	---	---	--

If you experience a combination of these symptoms: seek urgent medical care, call 911, or go to the hospital with an advocate. Ask: "Could it be sepsis?"

©2020 Sepsis Alliance sepsis.org **SEPSIS ALLIANCE**

TIME™ es un acrónimo fácil de recordar de los síntomas y signos claves de la septicemia:

T

I

M

E

TEMPERATURA Mas alta o baja de lo normal	INFECCIÓN Síntomas o signos de infección	MENTAL Deterioro mental, confusión, somnolencia o dificultad de despertarse	EXTREMADAMENTE ENFERMO Dolor intenso, molestias, falta de aliento
--	--	---	---

Si tiene más de uno de estos síntomas, sospeche sepsis. Busque atención médica inmediata, llame al 911 o vaya al hospital y diga: "Creo que tengo sepsis."

The materials presented and linked within it are meant to be shared and used for educational and awareness raising purposes only. The materials presented and linked within cannot be reproduced and sold for monetary value. When used for educational and awareness raising purposes, the materials must be used as follows:

- The materials must be used in their original unaltered state, that includes not adding alternate logos, websites, or additional graphics, etc.
- The Sepsis Alliance logo and any other logo on the material must be clearly visible
- The trademark(s) (™) must be clearly visible
- The copyright must be clearly visible
- Do not add any logo to the materials, unless you have been given prior approval from Sepsis Alliance
- The Sepsis: It's About TIME™ logo cannot be reproduced and used without the approval of Sepsis Alliance

Key Sepsis Facts

Sepsis is a public health crisis. You can use the facts below in your work. For additional facts, and their citations, please download the full fact sheets by clicking the titles below.

- More than **1.7 million people** in the U.S. are diagnosed with sepsis each year.
- In the United States, sepsis takes a life **every two minutes**.
- **350,000 adults die** from sepsis every year in the U.S. This is more than opioid overdoses, breast cancer, and prostate cancer combined.
- More than **75,000 children** develop severe sepsis each year in the U.S. and **6,800 of these children die**, more than from pediatric cancers.
- Sepsis is the number one cause of hospital readmissions, costing more than **\$3.5 billion** each year.
- Black individuals bear nearly **twice the burden** of sepsis deaths, relative to the size of the Black population, as compared to white individuals.
- Black women are **3.3 times more likely** to die from pregnancy-related causes than white women in the U.S. Native American and Native Alaskan women are **2.5 times more likely** to die than white women.

The Impact of Sepsis

Beauden's Sepsis Story

At three years old, Beauden developed sepsis after scraping his knee while on vacation. He is now a bilateral amputee and his family is determined to educate others about sepsis. Watch his parents share Beauden's sepsis story by [clicking here](#).

Matt's Sepsis Story

After developing sepsis in 2018, Matt Scott worked to get back on the court and won gold at the 2020 Paralympic Games in Tokyo in Men's Basketball. He was selected to serve as Team USA's Closing Ceremony flag-bearer at those games. Matt spoke with Sepsis Alliance about his sepsis experience. [Watch the video here](#).

Katy's Sepsis Story

In September 2018, Katy Grainger was a healthy and active 52-year-old mother of two living on the island of Kauai. She had no idea that a small purple blister on the side of her thumb would be the precursor to a week fighting for her life in the ICU with septic shock, ARDS, multiple organ failure, and DIC. Watch Katy tell her story, [by clicking here](#).

“When I gave birth to a healthy baby boy in July 2020 it never occurred to me that I could develop a life-threatening infection. In my mind infections after childbirth were a thing of the past not something that could happen to a healthy woman like me who has a routine delivery at a New York City hospital.”

[Read Laura's experience by clicking here.](#)

“Leaving the hospital without her was the hardest thing I have ever done. Matched only by living every day after without her. I continuously wonder “what if” we had recognized the signs [of sepsis] earlier or we had taken her in sooner?”

[Read Jamie's tribute to her daughter, Millie Rose, by clicking here.](#)

“What started as a blackhead turned into an extremely painful chest cavity abscess the size of half a baseball! I thought I was on the mend after my Urgent Care visit to get the sucker removed. Little did I know, this would be the start of a very painful and scary experience – in the middle of a pandemic!”
