EtchArt, LLC Company Profile And Info

EtchArt, LLC is dedicated to providing an easy, affordable way for people to decorate their living space with the stimulating beauty of decorative glass.

Invented in 1995 by company president Larry Cashion, [Wallpaper For Windows™](#) window films were developed as an alternative to decorating with expensive etched glass and stained glass. We get better at it every year.

Now our films are made-to-size so the customer doesn't have to trim them. The artwork is sized and balanced digitally before production. Once produced, the films are digitally cut to the size of the window or glass door. Whether it is a Wallpaper For Windows design or a customers logo, photo or custom art, a custom window film is the result.

“I knew that for people to use Wallpaper For Windows™ to decorate their homes, it would have to look as good or better than the real thing,” said Larry Cashion. “And we’ve succeeded. Wallpaper For Windows™ was voted one of the 5 best New Home Décor Products by ABC-TV’s Good Morning America”.

“It has been featured on home & garden TV shows, has been recommended in magazine articles published in “Woman’s Day”, “Better Homes & Gardens”, “Walls, Windows & Floors”, “Window Fashions”, “Draperies & Window Coverings”, “Home Products Guide”, “Ask the Handyman”, etc. and is used and recommended by decorating professionals across the country.”

The decorative beauty, the savings and the benefits combined with being easy to apply, adhesive-free, removable/reusable makes Wallpaper For Windows™ decorative window film the right choice for anyone. [Visit our media coverage page](#)
