WHY CYLANCE

CylanceMDR™ is the ideal solution for organizations looking to quickly bolster their cybersecurity capabilities without overhauling their existing security infrastructure. Our AI-powered platform, built on an open XDR architecture and enhanced with proprietary threat intelligence, seamlessly integrates with your current tools, allowing you to maximize your investments and get up and running with minimal effort. Our team of highly skilled experts delivers a comprehensive suite of security services, tailored to your organization's unique needs, ensuring a dramatic improvement in your security posture. With CylanceMDR, you can trust that your cybersecurity is in the hands of experienced professionals.

For added peace of mind, CylanceMDR™ Advanced provides a $1 million guarantee for qualifying customers.

PLATFORM

CylanceMDR, powered by AI and built on an open XDR architecture, offers comprehensive visibility across all attack surfaces, including endpoint, network, cloud, SaaS, identity, and email. With an expansive ecosystem of pre-built integrations, telemetry is automatically collected, enriched, and analyzed to discern attack signals with high-fidelity detections. The platform is further fortified by proprietary and off-the-shelf threat intelligence, driving platform-level analysis and human-led investigations.

COMPREHENSIVE SERVICES

CylanceMDR delivers a full suite of security services, ensuring a high level of protection for organizations. Incident response capabilities surpass simple endpoint isolation, incorporating automated, guided, and active response models for swift and effective threat mitigation. With a mean time to remediation (MTTR) of under 19 minutes, rapid resolution is prioritized. Expert-led, hypothesis-driven threat hunting combines structured and unstructured methods, analyzing 30 days of historical data to detect all threats. 24x7 alert monitoring enables proactive identification and response to potential security incidents. This comprehensive approach to security services ensures organizations are safeguarded by top-tier industry professionals.
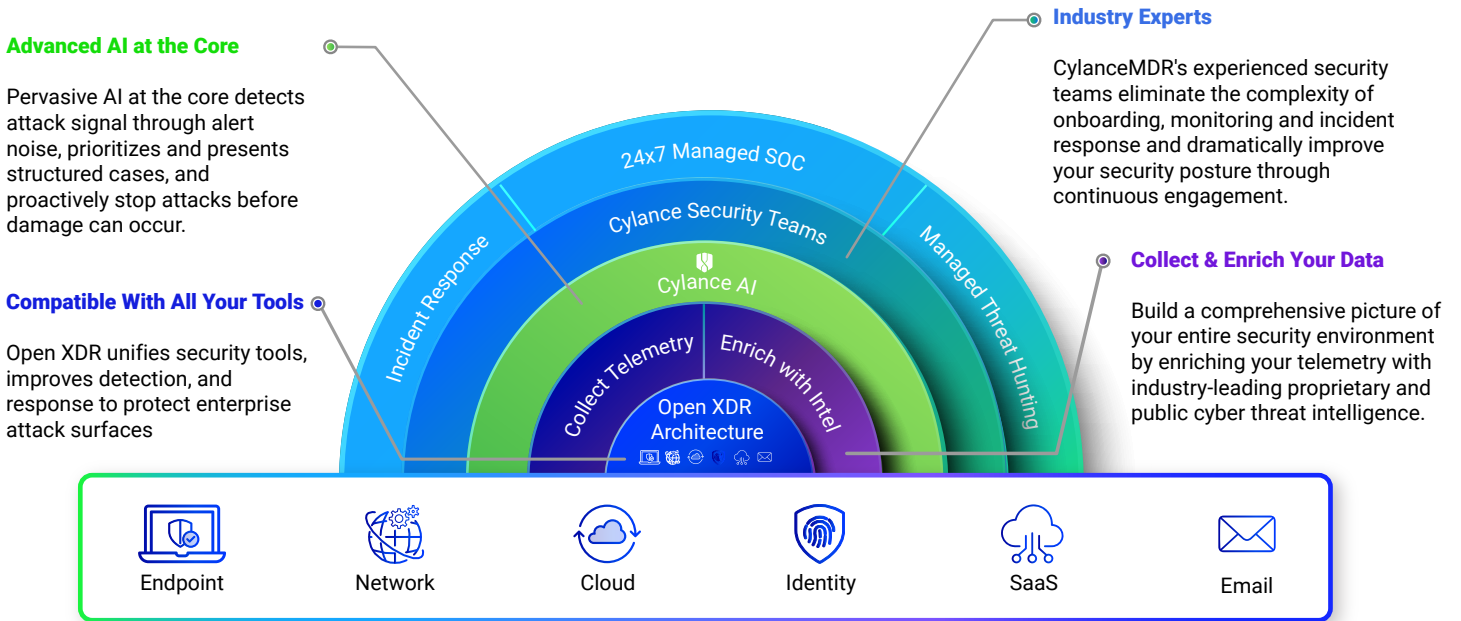

EXPERTISE AND GUARANTEE

Leverage the skills of seasoned security professionals with 15+ years of SOC experience, proven at SOCX, DefCon, and MITRE, and APT response certifications. The CylanceMDR team offers a personalized onboarding and adapts your security posture to emerging threats. Real-time operational tracking, ongoing communication, and strategic advisory sessions ensure a tailored approach. CylanceMDR's commitment to your security includes a $1 million guarantee for breach-related expenses, such as forensic investigations and cyber extortion payments, for eligible customers.

AI-Driven, Extensible Platform

The flexibility you need, enabling you to keep your tools, improve visibility, and enhance your security posture.

Advanced AI at the Core

Pervasive AI at the core detects attack signal through alert noise, prioritizes and presents structured cases, and proactively stop attacks before damage can occur.

Compatible With All Your Tools

Open XDR unifies security tools, improves detection, and response to protect enterprise attack surfaces

Industry Experts

CylanceMDR's experienced security teams eliminate the complexity of onboarding, monitoring and incident response and dramatically improve your security posture through continuous engagement.

Collect & Enrich Your Data

Build a comprehensive picture of your entire security environment by enriching your telemetry with industry-leading proprietary and public cyber threat intelligence.
