

## Press Release

### **Vantiva and Harmonic Partner to Offer Service Providers Easy Transition from DOCSIS to Fiber-based PON Technologies**

*Seamless interoperability between Vantiva's market-leading PON CPE and Harmonic's award-winning OLT platform delivers service providers more options to deploy greenfield fiber networks or upgrade existing network technologies*

Paris, France – October 7, 2024 – **Vantiva (Euronext Paris: VANTI)**, a global technology leader enabling Network Service Providers (NSPs) to connect consumers worldwide, today announced that it has expanded its strategic relationship with Harmonic to include interoperability of Vantiva's Passive Optical Networking (PON) Consumer Premises Equipment (CPE) and Harmonic's comprehensive cOS portfolio of Optical Line Terminal (OLT) network edge devices. The combined offering delivers NSPs an easy path to transition from DOCSIS-based technologies to multi-gigabit fiber speeds as well as additional options for enhancing existing fiber services. By leveraging Vantiva's proven PON CPE and Harmonic's innovative cOS OLT platform, the partnership will provide subscribers with best-in-class, in-home communications experiences and high-speed connectivity.

"With Harmonic's innovative cOS platform, we are strategically expanding our traditional joint DOCSIS support into the rapidly growing PON fiber market," said Leopold Diouf, Senior Vice President of the Product Unit at Vantiva. "With the new interoperability capabilities between Vantiva's PON CPE and Harmonic's extensive line of cOS OLTs, we are providing our NSP customers with more options to upgrade their networks by capitalizing on the numerous benefits of fiber, including high-speed connectivity, unparalleled in-home communications experiences and superior service reliability."

Vantiva's market-leading CPE, which consists of Optical Networking Units (ONUs) and integrated Gateways, have been deployed by many of the world's largest NSPs offering them the ability to deliver an unparalleled broadband experience – lightning-fast speeds, seamless connections and whole-home wireless coverage.

"Combining Vantiva's PON CPE solutions with Harmonic's cOS OLT platform provides a comprehensive, powerful offering to support any access technology deployment or DOCSIS network fiber expansion scenario," said Jeffrey Glahn, SVP of Global Sales Broadband at Harmonic. "We will provide our shared customer base with the ability to easily transition to PON from two trusted technology vendors, which we believe is a major step forward in our relationship and for the industry."

Harmonic's cOS platform is ideal for operators who are either looking to upgrade their existing DOCSIS network to 10 gigabit fiber technologies, or for those with existing fiber networks that want to add new capabilities, extend service reach and enhance subscriber quality of experience. The cOS platform powers broadband services to over 30 million homes served by more than 100 leading operators and enables the latest in both DOCSIS & FTTH PON technologies with a unified platform.

This latest extension of Vantiva’s partnership with Harmonic reinforces its 130-plus year ongoing commitment to innovation and continually providing services and solutions that set industry benchmarks. Through strong partnerships and sustainable, leading-edge technology, Vantiva is focused on enabling the connectivity that will change the game and reduce complexity and risk for its customers. The company’s ultimate goal is to empower them globally to master challenges and seize opportunities in the evolving connectivity market with best-in-class solutions and services.

## About Harmonic

Harmonic (NASDAQ: HLIT), the worldwide leader in virtualized broadband and video delivery solutions, enables media companies and service providers to deliver ultra-high-quality video streaming and broadcast services to consumers globally. The company revolutionized broadband networking via the industry’s first virtualized broadband solution, enabling operators to more flexibly deploy gigabit internet services to consumers’ homes and mobile devices. Whether simplifying OTT video delivery via innovative cloud and software platforms, or powering the delivery of gigabit internet services, Harmonic is changing the way media companies and service providers monetize live and on-demand content on every screen. ## About Vantiva

### Pushing the Edge

Vantiva shares are admitted to trading on the regulated market of Euronext Paris (VANTI).

Vantiva, formerly known as Technicolor, is headquartered in Paris, France. It is an independent company which is a global technology leader in designing, developing and supplying innovative products and solutions that connect consumers around the world to the content and services they love – whether at home, at work or in other smart spaces. Vantiva has also earned a solid reputation for optimizing supply chain performance by leveraging its decades-long expertise in high-precision manufacturing, logistics, fulfillment and distribution. With operations throughout the Americas, Asia Pacific and EMEA, Vantiva is recognized as a strategic partner by leading firms across various vertical industries, including network service providers, software companies and video game creators for over 25 years. The group’s relationships with the film and entertainment industry goes back over 100 years by providing end-to-end solutions for its clients.

Following the acquisition of CommScope’s Home Networks in January 2024, Vantiva continues its 130-year legacy as a global leader in the connected home market.

Vantiva is committed to the highest standards of corporate social responsibility and sustainability across all aspects of their operations.
