

ANNEX A: Exhibitors' Highlights (Non-Exhaustive. See full list [here.](#))

Exhibitor	Category	Exhibitor Profile
BEIJING HANLIN HANGYU INTERNATIONAL TRADING CO., LTD.	Automation & Digitalisation	We are a top brand of pharmaceutical machinery and solution provider, with a registered trademark - Dr. Pharm. We provide OSD equipment, including: high shear wet granulation line, fluid bed processor, dry granulation machine, vacuum mill, capsule filler, tablet pressing machine, high efficiency coating machine, blister packing machine, counter, cartoner etc. Our products have been under good performance and enjoy good reputation around all over the world.
BRUKER	Process Technology; Engineering & Green-Tech	Bruker provides high-performance scientific instruments and analytical solutions that drive post-genomic discoveries and applications to enhance human life. By enabling research at molecular, cellular, and microscopic levels, Bruker supports innovation, productivity, and success across life sciences, biopharma, microscopy, nanoanalysis, cleantech, and AI-driven semiconductor metrology. Bruker's specialized systems span preclinical imaging, clinical phenomics, proteomics, multiomics, spatial and single-cell biology, structural and condensate biology, as well as clinical microbiology and molecular diagnostics.
BUCHI	Process Technology	Founded as a leading subsidiary of BUCHI Labortechnik AG, BUCHI Singapore PTE LTD provides high-quality laboratory instruments and solutions to support a wide range of industries. Established to meet the growing demand for scientific innovation, BUCHI Singapore serves customers in pharmaceutical, food and beverage, chemical, environmental analysis, and academic research sectors. As part of BUCHI's global network, the Singapore branch delivers exceptional expertise in sample preparation, extraction, distillation, evaporation, spray drying, NIR process analyzer and chromatography. Key offerings include cutting-edge products such as the Rotary Evaporator, the Kjeldahl Distillation Unit, and the NIR Spectroscopy System, which are trusted worldwide for their robustness and performance.
CDI (CHEMICAL DATA INTELLIGENCE) PTE. LTD.		Chemical Data Intelligence (CDI) specializes in digital chemistry, providing R&D and software development in chemical process development, chemoinformatics, and AI. CDI creates AI tools and solutions for sustainable chemical practices, including energy prediction, functional molecule design, and environmental assessment. Our data-driven models optimize energy use, reduce chemical inventory, and design functional, biodegradable, low-toxicity molecules. We also offer consulting and software to identify greener reagents, improve synthesis yield, and lower costs and environmental impact.
CYCLECT ENGINEERING PTE LTD	Engineering & Green-Tech; Packaging,	Founded in 1943, Cyclect Group is a leading provider of engineering and technology-driven solutions for industries worldwide, including process manufacturing, energy, and infrastructure sectors. With operations in 10 countries and over

	Storage & Supply Chain	1,000 professionals, Cyclelect delivers comprehensive engineering, construction, maintenance, and technical services. Our solutions help clients optimize operations, enhance sustainability, and meet stringent safety standards across industries such as petrochemical, pharmaceutical, and semiconductor manufacturing.
EVONIK		Evonik Industries AG is one of the world leaders in specialty chemicals. Active in more than 100 countries around the world, Evonik goes far beyond chemistry to create innovative, profitable and sustainable solutions for customers. Headquartered in Singapore and covering all countries in the region, Evonik SEAAZ has state-of-the-art manufacturing sites, sales offices, research and development centers as well as technical service centers located in Australia, Indonesia, Malaysia, New Zealand, Philippines, Singapore, Thailand and Vietnam. Each site is equipped with specialized focus and technological expertise, enabling us to tailor solutions to meet the diverse needs of our customers in Asia and beyond.
ITALVACUUM	Engineering & Green-Tech	Italvacuum specializes in engineering, manufacturing, and supplying industrial vacuum pumps and vacuum dryers for pharmaceutical, fine chemical, and chemical industries. Italvacuum's manufacturing capabilities include a wide range of original and patented vacuum equipment, that comply with the main International standards (UL, ATEX, ASME, and PED) and with the latest FDA and cGMP regulations. Thanks to 85 years of experience, Italvacuum can provide turnkey installations and realize bespoke equipment and systems built according to customers' process requirements. The highest levels of quality, safety, and productivity in any application.
LIM KIM HAI ELECTRIC CO (S) PTE LTD	Engineering & Green-Tech; Automation & Digitalisation; Packaging, Storage & Supply Chain	Founded in 1958 with humble beginnings as an electrical shop, Lim Kim Hai Electric has now become synonymous with excellence in the electrical industry. At the core of our mission was the commitment to serving our customers with Safe & Save electric solutions. We constantly evolve to offer electrical and safety solutions that remain aligned with the latest market shifts. W Inspired by green initiatives, we began a push towards energy efficient solutions that empower businesses to reduce their carbon footprint, while enjoying greater energy and cost savings
NANTONG SUTONG SEPARATION TECHNOLOGY CO., LTD	Engineering & Green-Tech; Packaging, Storage & Supply Chain	Our company focuses on the design and manufacture of tower internals, tower packings and trays for more than 39 years. Related processes for distillation, absorption, extraction, regeneration, evaporation, stripping, membrane separation, waste water treatment and other tower separation and environmental protection process dust collector and fog eliminator design.
ROBERT BOSCH (SEA)	Engineering & Green-Tech	Bosch BOGS: A revolution in measurement technology. The Bosch BOGS is a gas analysis device for laboratory use that sets new standards. As a true multi-gas analyzer, it offers a sustainable solution for many applications. Rely on completely new possibilities with the BOGS to monitor your gas composition inline and thus

		ensure control over your process and your gas. Experience the future of gas analysis with our compact Raman-based BOGS. It enables the simultaneous detection of various gases and, in the first expansion stage, has intelligent evaluation algorithms for hydrogen and natural gas applications directly on board.
SATAKE MULTIMIX (M) SDN BHD	Engineering & Green-Tech; Packaging, Storage & Supply Chain	Since its founding in 1920, Satake Multimix Corporation has stood strong as the market leader in Mixing Technology and pioneer in Environmental Testing Equipment. Established in January 2021, sales operations started in June 2021, and production started in September 2022. As a specialist in manufacturing mixers and mixing equipment for laboratory and industrial scales, we offer sales and maintenance services with technical support. Our goal is to provide high-quality and high-performance mixing products with economy pricing for the local and Southeast Asian markets.
WATSON-MARLOW		With more than 60 years of technical expertise, over one million pumps installed worldwide, over 60 markets with 13 sales offices in APAC, Waston-Marlow Fluid Technology Solutions is the world leader in manufacturing peristaltic pumps and associated fluid path technologies for wide range of applications in process industries and life science industries, (process industries) food and beverage, and sanitary; mining; water and wastewater; industrial; pulp and paper; power generation; EV battery manufacturing; (life sciences) pharmaceutical and biopharmaceutical, medical and diagnostic devices and OEM and etc.
