

VIRTUAL CISO ADVISORY SERVICES

SECURITY LEADERSHIP MATTERS

Cybersecurity is critical, and threats evolve daily. Is your organization prepared for the next cyber incident without a dedicated security executive to guide your response?

You are not alone.

Most SMBs operate without a full-time CISO, relying on IT teams to handle both operations and security strategy. The result is often reactive security measures, unclear compliance status, and inadequate incident readiness.

When breaches occur, the lack of executive security leadership becomes painfully evident. Unfortunately, we see the consequences far too often.

Advanced Logic's vCISOs provide the strategic security leadership your organization needs to stay protected and compliant. We objectively assess your security posture, develop actionable response plans, and ensure your business is prepared for regulatory audits and cyber insurance requirements.

Project Engagements:

- Cyber Risk Assessment & Gap Analysis
- Security Remediation Roadmaps
- Incident Response Plan Development
- Incident Response Testing
- Cyber Insurance Readiness Reviews
- Executive Briefings & Board Prep
- Compliance Checkups
- Security Training Programs
- Supply Chain Risk Assessment
- Post-Incident Reviews & Action Plans

Benefits:

- Potentially reduce cyber insurance premiums
- Competitive advantage & customer trust
- Minimize downtime & disruption
- Streamlined compliance and audits
- Risk-based security roadmaps aligned to organizational goals
- Proactive incident readiness
- Collaborative expertise & support from industry certified professionals
