

USA Impact

Groundbreaking Study of Dolly Parton's Imagination Library

Children in the US were **11x more likely** to be interested in books and **15x more likely** to join in during shared book reading compared to children not in the program.

Children in the US were nearly **3x more likely** to demonstrate concepts about print compared to children not in the program.

Children in the US were **9x more likely to initiate** shared book reading compared to children not in the program.

Children in the US were **5x more likely** to be interested in reading compared to children not in the program .

Caregivers were **6x more likely** to count images, **8x more likely** to describe images and **5x more likely** to let the child hold the book compared to caregivers not in the program.
