GATEKEEPER

Exam Rooms
What GateKeeper Does For You

Faster EMR Login

One key logs users into computers, websites, and EMRs—all **without typing ANY passwords.**

2FA Without Extra Steps

Secure login to all your accounts without hassle or fiddling with phones/USB sticks to login.
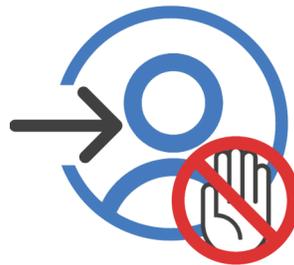

Kiosk Mode—Shared Accounts

Rapid login and logout between multiple users on multiple workstations at lightning speed.

See More Patients Everyday

Patients over paperwork- caregivers can respond to patients faster and with less downtime.

Hands-Free Password Login

No need for fingerprint scanners or opening phones to type a code, wireless login to any account.

Compliance: Automated

HIPAA compliance automated to doctors and nurses and see more patients everyday without stress.

PC Auto-Locks When User Leaves

No more extra compliance tasks like having to remember to lock the PC every time you leave.

Timeout Policies Are Intrusive

Timeout policies are either **long and ineffective, or short and intrusive** to user workflow—not anymore.

The "Key" To Success

Add, edit, delete passwords all day and users won't notice or care. The new age of passwordless is here.
