

## **HASHKEY** ▶PRO

HashKey Pro is an institutional-grade, full-service platform launched by HashKey MENA. We aim to serve financial institutions such as brokers and banks, asset management firms, etc., with all-in-one trading and custody services.

### HashKey Pro's Main Functions

#### Order Book

An electronic registry of buy and sell orders organized by price level for specific trading pairs.

#### OTC

A request-for-quote trading interface where investors can place requests for large

A request for quote trading interface where investors can place requests for large block trade orders that settle safely and securely on-platform.

In addition to the essential services, HashKey Pro will soon expand its product offering to include more financial products.

HashKey Pro provides its customers with a world-grade trading matching engine and reliable, insured custodian service for cryptocurrencies. It provides efficient and secure institutional-level solutions such as the Omnibus structure, API connection, brokerage service, and sophisticated account structure to facilitate professional institutions' requirements.
