

CURRENT STATE OF YOUR PIPELINE

# Your customer is ready to buy. Your sales process isn't ready to close.

Drive books your next job near where your crew already is — so every appointment fills a route instead of creating one.

*Tried other scheduling tools that didn't stick? They weren't built to truly handle the complexities of home service.*

**78%** of homeowners buy from the first to respond

**74%** of inbound calls go unanswered

**85%** of leads gone within 24 hours

Your tech is 22 miles from the next job when there's one 4 miles away. Your rep is leaving voicemails while the lead goes cold.

**That's a revenue leak — and most software doesn't see it.**

HOW DRIVE FIXES IT

### Books Near Where Your Crew Already Is

Drive factors actual drive time — surfaces nearby appointments instead of distant ones. More stops per day, less fuel, fewer late arrivals. No dispatcher required.

### Instant Lead Qualification

Smart intake forms filter leads automatically. Ready-to-buy customers book themselves — you work the ones who need convincing.

### Right Rep, Right Job

Only qualified techs get assigned per job type — prioritized by specialty & proximity.

### Customer Self-Booking

Send a link, let customers book or reschedule 24/7. Eliminates the callback loop entirely.

### Never Double Booked

Conflict detection blocks overlaps automatically — every booking fits real crew availability, no surprises.

### Route-Optimized Booking

Kanban view shows jobs ordered by proximity. Drag to adjust — full day visible at a glance.

### Shared Calendar Views

Whole team sees the same live schedule on mobile and desktop. Updates sync in real time.
