

Value-Based Reimbursement State-by-State

A 50-State Matrix Review of Value-Based Payment Innovation

Change Healthcare has conducted a review of the 50 states', plus Puerto Rico's and Washington DC's, payment reform initiatives. The study reveals a range of approaches and significant variation in the scope, leadership commitment, and resources devoted to the transition from fee-for-service to value-based reimbursement.

The table below provides an aggregated look at which strategies states have adopted, whether they have chosen to set VBP targets, the scope of their initiative (Medicaid or multi-payer), and the approximate year that the VBP initiative was implemented. Get the full report at www.StateVBRstudy.com.
