

Vanda Corporate Website – Products Overview Page^{1,2}

Before: October 22, 2018

After: October 23, 2018

The screenshot shows the 'Before' version of the Vanda Corporate Website. The header includes the Vanda Pharmaceuticals Inc. logo, navigation links (Home, News, Careers, Contact Us), and a secondary menu (ABOUT VANDA, PRODUCTS, PIPELINE, PARTNERING, INVESTOR RELATIONS). The main heading is 'PRODUCTS Overview'. On the left, there are three buttons for 'HETLIOZ®', 'Fanapt®', and 'HETLIOZAccess™'. The main content area features a paragraph about Vanda's focus, followed by two columns for 'Hetlioz® (tasimelteon) capsules 20mg' and 'Fanapt® (iloperidone) tablets'. Each product column includes a brief description and a link to full prescribing information. The footer contains the same navigation and copyright information as the header.

The screenshot shows the 'After' version of the Vanda Corporate Website. The layout is identical to the 'Before' version, but with a significant design update. The 'HETLIOZ®' button is now a simple text link, and the 'Fanapt®' and 'HETLIOZAccess™' buttons are also text links. The product descriptions for 'Hetlioz® (tasimelteon) capsules 20mg' and 'Fanapt® (iloperidone) tablets' are more concise and include a direct link to the full prescribing information. The footer navigation and copyright information remain the same.
