IN THE EXHIBIT HALL
BOOTH #100

Dear Active Trader:

For years, **TradersEXPO** has sought to educate beginning and experienced traders about the best new and established trading strategies and techniques. We've also brought the sharpest minds in the trading world together in one place to evaluate the current market environment.

This year's **TradersEXPO New York** will continue that tradition, and also introduce numerous new and unique market indexes and indicators that will help traders gauge, trade, and hedge risk in every market sector as well as forecast market activity for the remainder of what promises to be a groundbreaking year.

Today's markets stand at a precipice. Will this historic bull market continue, or should traders be prepared for the end? Much of the answer will be based on historic trade negotiations and real-time geopolitical issues. We have collected the best minds in trading to help you answer these key questions.

TradersEXPO is a place where new ideas are launched and where attendees can obtain the tools to become their own market wizards going forward. The world of trading — along with the world in general — is filled with greater risk and greater potential rewards. Fortunately, there are new tools to navigate these risks and our team of experts will provide the expertise to equip traders, like you, with the tools you need to succeed.

The **20th Anniversary TradersEXPO New York** will dive into the world of **cryptocurrencies**, introduce products and resources to **exploit both new and established market sectors** and take an in-depth look at the forex sector. With so much of the current volatility surrounding global trade and geopolitical drivers, it is more important than ever to understand the world of foreign exchange. Our Forex Summit and Global Macro Edge Series tracks will include some of the most cutting-edge analysis and expert speakers covering currency markets. Don't miss out.

Finally, volatility has returned in numerous market sectors, and our experts are prepared to deliver the tools you need to not only navigate and survive greater volatility, but to profit from it.

We are excited to see you here!

Sincerely,

Kim K. Githler | Chair & CEO

P.S. Save the Date for The MoneyShow Philadelphia on September 26 - 28, 2019, at the **Sheraton Philadelphia Downtown**. Join us in our exciting new location and get the knowledge, wisdom, and tools to profit in the constantly changing markets.

MEDIA PARTNERS

I attended The MoneyShow as both a speaker and an exhibitor. The organization of the event by The MoneyShow team is a stellar experience, as attendance at my presentations was impressive and flow in the exhibit hall was constant yet not overbearing. The quality of the attendees was perfect for companies looking to gain exposure to serious investors.

- DR. ALAN ELLMAN
President of The Blue Collar Investor Corp.

MoneyShow's content and events are incredible catalysts that empower individuals to become self-directed investors. Kim Githler is a true leader in this space, connecting smart, engaged investors with powerful content. Moneyshow has for more than three decades, been furthering individuals with a passion for investing and trading.

- KRISTI ROSS | co-CEO & President of tastytrade

Horizons ETFs has been a partner of The MoneyShow for several years. During that time, this preeminent investment conference has enhanced our investor education initiatives, increased our brand's awareness and helped grow our overall business.

IN-DEPTH MASTER CLASSES

These in-depth, more exclusive classes taught by industry experts allow you to immerse yourself in specific topics and provide ample Q&A time, so you can take your knowledge to the next level.

Intermarket Analysis: 20 Years of Success Developing Trading Systems*

Sunday, March 10 • 8:30 am – 12:30 pm

MURRAY HILL WEST

Intermarket analysis studies the interrelationships between various related markets. Standard correlation analysis between markets is not useful if our goal is to predict future prices or generate profitable signals, but a study of intermarket divergence achieves these goals. **Trading system developer Murray Ruggiero** coined a methodology called “intermarket divergence” in the mid-1990s allows traders to gauge the predictive power of this analysis and produce 100% objective signals. For over 20 years, he has used this methodology to develop trading systems, which have produced robust and reliable trading signals.

Some Points Covered in This Class Include:

- What intermarket divergence is and why it works
- Finding reliable intermarket signals, which are predictive of markets you are trading
- Knowing when intermarket-based systems work and when they don't
- What intermarket state analysis is and why it is an advance over intermarket divergence

When you leave this Master Class, you will possess knowledge of how to develop reliable trading systems based on intermarket divergence and state analysis.

The Practical Application of Bollinger Bands*

Sunday, March 10 • 9:00 am – 12:00 pm

MURRAY HILL EAST

Bollinger Bands are an advanced form of trading band developed by John Bollinger and used by traders worldwide. All trading bands exist for a single purpose, to answer the question “Are prices relatively high or low?” The answer to that question is useful in developing trading systems, pattern recognition, and many other market operations. Bollinger Bands can be applied in all the financial markets including equities, forex, commodities, and futures and they can be used in most time frames, from very short-term periods, to hourly, daily, weekly, or monthly.

In this Master Class with **John Bollinger, president and founder, Bollinger Capital Management**, you will learn how and why Bollinger Bands were developed, how they were initially used, and how they are used today. You'll learn the two most important Bollinger Band indicators and one of the newest BB indicators, BBTrend. Finally, you will learn some trading setups that will allow you to put what you have learned to work. There will be lots of time to answer your questions and no previous knowledge of Bollinger Bands or the related material is necessary.

All Master Class attendees will receive a free one-month subscription to the *Bollinger Bands Letter*.

Kairos: the Supreme Opportunity Where a Trader Has the Greatest Edge*

Sunday, March 10 • 1:00 pm – 5:00 pm

MURRAY HILL EAST

Kairos is defined as the supreme moment. Markets are a zero-sum game. To have the edge over the person on the other side of the trade, one must understand what may be coming against them, avoid it, and instead get into flow with it. By identifying the Kairos moment, a trader can identify when the pattern is most likely in their favor with the best possible risk/reward ratio.

In this Master Class, **Jeff Greenblatt, also known as Fibonacciman**, will help you learn to identify Kairos moments through balancing price and time square outs and vibrations. While no two patterns are ever the same, the high-probability tendencies you will learn repeat over and over.

- The real reason why markets change direction; it's not what most people think.
- The most precise way to identify the highest-probability point of where the pullback and sell bounces on any chart, which leads to the continuation of the trend
- What is really driving moves in the intraday E-mini
- The most precise way to uncover tight double high/low consolidations that lead to the best moves
- How we identified a long-term change in the soybeans market
- How a 36-point pullback in gold led to an explosive move in less than three days (not all pullbacks are created equal)
- How to identify changes of direction on the intraday E-mini
- How options players can get much closer to the best part of the move without wasting the time element of the instrument
- A 21-year reading that lined up at the bottom of the 2008-09 financial crisis
- An 18-year reading that lined up at the high of the recent October sell off

Additionally, most Fibonacci/Elliott-based traders only know of the standard default retracement levels available on most trading software platforms. You will learn how retracements line up with Kairos, which will open up many more opportunities.

This methodology can be used for stocks, commodities, futures, forex, intraday or long term, swing or intraday traders, and can be applied to any time frame. Jeff will also discuss zero-sum markets and show how upward or downward pressure develops on charts to expose the best moves without using any indicators.

Kairos price and time squaring will be introduced, and you will learn how it works and how to develop high-probability trading strategies that give the highest-probability risk/reward ratios.

The master classes were excellent. The ability to meet other traders and share ideas was excellent.

– B. LEIDT | Killingworth, CT

IN-DEPTH MASTER CLASSES

These in-depth, more exclusive classes taught by industry experts allow you to immerse yourself in specific topics and provide ample Q&A time, so you can take your knowledge to the next level.

CME Group Accelerated Futures Trading Course*

March 11 • 8:00 am – 12:00 pm **GRAMERCY EAST**

Sponsored by

Join CME Group at The TradersEXPO New York for a hands-on, half-day accelerated learning course designed exclusively for futures traders. Learn to trade futures with effective strategies to minimize risks without missing market opportunities. This expedited course is uniquely designed for futures traders of all levels, and you will leave prepared for portfolio growth.

Regardless of the products you currently trade, all traders should be educated on futures and options on futures because of the insights they provide into many different asset classes.

Paul Kamhout will kick-off the session with a brief introduction to futures including:

- Benefits of futures
- How they work and why they're important for a trader's portfolio
- Characteristics to look for and why they're useful

Followed by a discussion of CME Group's most liquid products and how to incorporate them into your trading portfolio using real-world examples.

Other topics to be covered include:

- Deep-dive into the crude oil markets with Carley Garner and Bob Iaccino
- Deep-drive into trading equity Index futures and options with Jim Iuorio and Scott Martin
- Finally Carley, Bob, Jim, and Scott will form a panel to discuss futures and options on futures

Trading Highest Probability Patterns Where Price and Time Meet!*

March 11 • 1:00 pm – 5:00 pm

GRAMERCY EAST

Everyone talks about price but not timing! When price and time meet, it gives a high-probability trade. If you are a trader looking for consistent profits, you need to attend this workshop. Two timing elements combined with a trading plan gives you an incredible trading system. Don't believe it, check it out!

Manesh Patel will begin this Master class teaching you about seasonality. Everyone talks about seasonality, but this is different. He applied machine learning algorithms (Google, Amazon, etc.) on seasonality and discovered how to take 50-60% probability seasonal patterns and turn them into high-probability trades. Manesh will show you what to look for in futures, currencies, and stocks in global markets from US, Europe, Middle East, Asia, and more. And all of this is done without a chart!

Once the high-probability trades are found, he will confirm them with technical analysis. The technical analysis he will teach you is simple and very powerful.

Time permitting, Manesh will teach you how to forecast these shaded setups for a 3:1 reward/risk! Also, he will show you how to optimize any other technical system from Fibonacci, Elliott Wave, Bollinger Bands, etc., with the IMTFTechnology.

Here is summary of everything you will learn:

- How to find high probability seasonal setups
- Proper money management (3:1 reward/risk trades)
- Proper stop placement
- Breakout entries
- Pullback trade setups
- Managing trades to preserve profits
- An overall trading plan

IN-DEPTH MASTER CLASSES

Mastering the What, How, & When with Investments and Their Executions*

Tuesday, March 12 • 8:00 am – 12:00 pm

GRAMERCY EAST

In this Master Class, **Raymond Rondeau, technical analyst and contributing editor, *AAll Computerized Investing***, will focus on the often-overlooked *When* and *How* areas of trading and investing, and then contour that material to the *What* for the current market environment. Included will be analysis on a number of the most widely traded investment vehicles in today's markets and a live attendee's choice stock analysis session.

Beginning material will include some basics on portfolio creation, calculating appropriate position sizes, diversifications, and the basic elements of creating attainable returns with a primary focus on risk. Also, in this section will be a segment showing a number of "tricks of the trade" on various order types to attain more favorable prices and gain more execution control.

Two special segments will also be included: In the first segment, Ray will look at how index investors can gain a mathematical advantage (and improved returns) by exploiting pricing inefficiencies in certain investment vehicles. In the second segment, Ray will look at some tools and methods to capture dividends more efficiently.

Then to the primary focus of this class, how to definitively locate sound, tangible, and logical investment entry and exit prices. Target selections will be based on a variety of methods, including chart reading, key price patterns, spotting price manipulations, technical indicators, and certain key fundamental measurements.

For those who emphasize indicators, statistics from Ray's *AAll Classic Technical Indicator* series of articles will be provided. This will include analysis on every stock in the S&P 500 over a 10-year period. Detailed statistics and rankings of the best-performing and the specific methods and exact parameters on RSI, stochastics, MACD, and Bollinger Bands will be reported.

Lastly, Ray will look at the often-overlooked element of intuition by observation and reasoning. This is an area that many professional investors put a lot of weight into, especially with regard to price/news-event and price/derivative divergences. This all leads to Ray's 10 Classic Sell Signals—a checklist of the 10 things that an investor should look for and that could be indicating that their stock may be heading for a significant decline.

COT Report: From Mines to Data Mining*

Tuesday, March 12 • 1:00 pm – 5:00 pm

GRAMERCY EAST

This all-new Master Class taught by **Andy Waldock, founder, Commodity & Derivative Advisors**, will begin with a brief description of what the COT Report is, followed by a more in-depth look at the close links between the biggest players in the markets and the connections they share. Specifically, the interwoven relationships among the board members of commodity-heavy Fortune 500 companies like Tyson Foods and Monsanto, who both have board members with shared seats on Procter and Gamble's board, as well as others.

He'll then explain how the COT groups' participation can be measured in ways other than the raw data or base TradeStation plotting options. Andy will create examples that also show how the commercial traders behave differently from market to market and why using the commonly plotted raw values is of little use in actual trading. He'll finish the data discussion with how to determine market capacity and what happens in a speculative blowout.

Finally, Andy will get technical. He'll include the code for a COT indicator that he uses to determine just how overextended a market may be, and correspondingly, how violently it may snap back. He'll then go into a deeper look at the reversal methodology discussed in the preview.

Andy will discuss how to use this data to create a mechanical mean-reversion trading system that can be broken down in English or tested on your favorite genetic algorithm generation program like, Adaptrade. Finally, he'll also show you how he uses COT data to filter the trades in his seasonal trading program.

You'll learn the two most important Bollinger Band indicators and one of the newest BB indicators, BBTrend. Finally, you will learn some trading setups that will allow you to put what you have learned to work. There will be lots of time to answer your questions and no previous knowledge of Bollinger Bands or the related material is necessary. All Master Class attendees will receive a free one-month subscription to the <i>Bollinger Bands Letter</i>.</p> <p>*\$349 per person</p> <hr/> <p>1:00 pm – 5:00 pm</p> <p>Kairos: The Supreme Opportunity Where a Trader Has the Greatest Edge*</p> <p> Jeff Greenblatt Director Lucas Wave International, LLC</p> <p>Kairos is defined as the supreme moment. Markets are a zero-sum game. To have the edge over the person on the other side of the trade, one must understand what may be coming against them, avoid it, and instead get into flow with it. By identifying the Kairos moment, a trader can identify in their favor with the best possible risk/reward ratio.</p> <p>In this Master Class, Jeff Greenblatt, also known as Fibonacciman, will help you learn to identify Kairos moments through balancing price and time square outs and vibrations. While no two patterns are ever the same, the high-probability tendencies you will learn repeat over and over.</p> <p>*\$349 per person</p>	<p>8:30 am – 12:30 pm</p> <p>Intermarket Analysis: 20 Years of Success Developing Trading Systems*</p> <p> Murray Ruggiero Vice President of Research and Development TradersStudio, Inc.</p> <p>Intermarket analysis studies the interrelationships between various related markets. Standard correlation analysis between markets is not useful if our goal is to predict future prices or generate profitable signals, but a study of intermarket divergence achieves these goals. Trading system developer Murray Ruggiero coined a methodology called "intermarket divergence" in the mid-1990s, which allows traders to gauge the predictive power of this analysis and produce 100% objective signals. For more than 20 years, he has used this methodology to develop trading systems, which have produced robust and reliable trading signals.</p> <p>Some Points Covered in This Class Include:</p> <ul style="list-style-type: none"> • What intermarket divergence is and why it works • Finding reliable intermarket signals, which are predictive of markets you are trading • Knowing when intermarket-based systems work and when they don't • What intermarket state analysis is and why it is an advance over intermarket divergence • Developing a basket of intermarket-based systems on different markets and different intermarket pairs, so that the combination of these systems provide diversification <p>When you leave this Master Class, you will possess knowledge of how to develop reliable trading systems based on intermarket divergence and state analysis.</p> <p>*\$349 per person</p>

WELCOME RECEPTION IN THE EXHIBIT HALL

6:00 pm – 7:30 pm • Rhinelander Gallery

Get your first look at the state-of-the-art products and services on display in the Interactive Exhibit Hall. Everyone talks about seasonality, but this is different. He applied machine learning algorithms (Google, Amazon, etc.) on seasonality and discovered how to take 50-60% probability seasonal patterns and turn them into a high-probability trades. Manesh will show you what to look for in futures, currencies, and stocks in global markets from US, Europe, Middle East, Asia, and more. And all of this is done without a chart! Once the high-probability trades are found, he will confirm them with technical analysis. The technical analysis, he will teach you is simple and very powerful. *\$349 per person</p>	<p>2:45 pm – 3:15 pm Trading Buyback Announcements (OPTIONS) Ashok Yarlagadda Delphian</p>

G2 Petroleum LLC, founded in 2008, is known for its transparency and resolve. In 10 years, G2 has acquired interest in high-producing oil fields across 5 states, showing consistent growth, even during the oil crashes of 2008 and 2014. Founded by, Cotton Graham, G2's commitment to investor transparency was highlighted in 2014, when despite oil dropping to \$30/barrel, Mr. Graham purchased 2000 acres in Burkburnett, TX and created, oil production company, Newport Operating LLC. Newport allows him to oversee shallow-well production, while providing fact-driven information to G2's investment partners.

MAY

MoneyShow LAS VEGAS

May 13 – 15, 2019 | Bally's/Paris Resorts | Las Vegas, NV
Streaming Live May 13 – 15. On-demand Starting May 25.

Meet and mingle with the largest gathering of money and trading experts. Gain access to the finest analysts, advisors, financial and political commentators, traders, and money managers.

»» SPECIAL TRACKS

THE ALL-STARS OF OPTIONS TRADING

This always-popular event provides beginner, intermediate, and advanced options traders with the rare opportunity to network with the country's top professional traders while learning their time-tested strategies for generating cash flow and mitigating portfolio risk in bullish, bearish, and neutral markets.

ALTERNATIVE INVESTING

During this special event, experts will showcase a variety of alternative investments including real estate, energy, fine art and others, while explaining how integrating these asset classes into a plain-vanilla equity portfolio could provide the right amount of spice to boost returns and dampen risk through up and down markets.

THE CANNABIS INVESTING EVENT

This in-depth event will provide investors with the opportunity to learn about the high-growth cannabis sector as they hear from a roster of company executives who are focused on specific sub-sectors, elite analysts who cover this rapidly developing industry, and advocates who are leading the cannabis legalization movement all over the world.

THE WORLD OF ETF INVESTING

Transparency, diversification, and low-cost access to practically any market, sector, or asset class make exchange traded funds attractive, viable solutions for investors and traders alike. This one-day ETF event is designed specifically for self-directed investors, active traders, and financial advisors looking to create a profitable ETF strategy.

INCOME & GROWTH SUMMIT

Highlighting unique income investing opportunities that may be flying under the radar, as well as undervalued growth stocks, this special event will help investors achieve higher returns and better diversify their portfolio.

THE MONEY, METALS, & MINING SYMPOSIUM

Elite metals and mining experts will reveal which metals will outperform the markets in 2019 during this in-depth event. Investors will also learn about the specific companies poised for growth, and how to profitably and safely capitalize on the opportunities within this sector.

WOMEN ON WEALTH

This special event, designed for and open just to women, discusses the different risk preferences between men and women, and addresses the unique financial needs, wants, and desires of women to help them build a sound financial foundation for themselves and their families.

JUNE

MoneyShow SEATTLE

June 15 – 16, 2019 | Hyatt Regency Seattle | Seattle, WA
Streaming Live June 15 – 16. On-demand Starting June 26.

Meet and mingle with the largest gathering of money and trading experts. Gain access to the finest analysts, advisors, financial and political commentators, traders, and money managers.

THE ALL-STARS OF OPTIONS TRADING

THE ALL-STARS OF OPTIONS TRADING

This always-popular event provides beginner, intermediate, and advanced options traders with the rare opportunity to network with the country's top professional traders while learning their time-tested strategies for generating cash flow and mitigating portfolio risk in bullish, bearish, and neutral markets.

ALTERNATIVE INVESTING

ALTERNATIVE INVESTING

During this special event, experts will showcase a variety of alternative investments including real estate, energy, fine art and others, while explaining how integrating these asset classes into a plain-vanilla equity portfolio could provide the right amount of spice to boost returns and dampen risk through up and down markets.

THE WORLD OF ETF INVESTING

THE WORLD OF ETF INVESTING

Transparency, diversification, and low-cost access to practically any market, sector, or asset class make exchange traded funds attractive, viable solutions for investors and traders alike. This one-day ETF event is designed specifically for self-directed investors, active traders, and financial advisors looking to create a profitable ETF strategy.

INCOME & GROWTH SUMMIT

INCOME & GROWTH SUMMIT

Highlighting unique income investing opportunities that may be flying under the radar, as well as undervalued growth stocks, this special event will help investors achieve higher returns and better diversify their portfolio.

The MONEY, METALS, & MINING Symposium

THE MONEY, METALS, & MINING SYMPOSIUM

Elite metals and mining experts will reveal which metals will outperform the markets in 2020 during this in-depth event. Investors will also learn about the specific companies poised for growth, and how to profitably and safely capitalize on the opportunities within this sector.

Programs/lectures are really informative and organized. I commend a job well done to all organizers and parties involved. Please continue to educate traders and present us more high caliber speakers. Cheers!

NOTES

Terms of Attendance – Important Information for Attendees: Through its seminars, conferences, MoneyShow Membership Programs (each a "Membership Program") and expos the producer of this Event or Membership Program (the "Producer") makes available to the attendee or Member a variety of independent sources, as well as sources affiliated with or employed by the Producer or MoneyShow.com, that offer trading and investment advice and related services and products. These resources provide unique opportunities for the attendee or Member to become informed about trading and investment choices, to hear respected market specialists, to question speakers, exhibitors or Membership Program contributors, to observe, evaluate, and compare. The Producer does not endorse, directly or indirectly, any investment, trade, trading or investment advice, or information or any product or service offered by speakers or exhibitors. Except as specifically stated below, the Producer receives no fees or commissions from exhibitors, advertisers, or web or Membership Program contributors based on their sales. Every trader and investor should consider all advice and all offerings of products and services on their own merit and for suitability to the individual's personal needs and circumstances.

No content presented at this Event or through Membership Programs by an independent source, or by an affiliate or employee of the Producer constitutes a recommendation that any particular investment, security, portfolio of securities, transaction, or investment strategy is suitable for any specific individual. To the extent that any of the content presented at this Event or through Membership Programs may be deemed to be investment advice, such information is impersonal and not tailored to the investment needs of any specific individual. Any view expressed by an independent source or by an affiliate or employee of the Producer regarding a particular investment, security, portfolio of securities, transaction, or investment strategy are the speakers' or exhibitors' own opinions and should not be construed as anything except the speakers' or exhibitors' personal opinions; they do not reflect the views of the Producer. The Producer has no standing and no means or process by which it can adequately monitor or control an independent exhibitor's, speaker's or contributor's oral or written representations. Additionally, the views, analysis, advice, and recommendations expressed by exhibitors, speakers or contributors affiliated with or employed by the Producer are not subject to the Producer's review or verification, and may change at any time. **All information provided at this Event or through Membership Programs is provided on a "use at your own risk" basis and every individual should independently undertake such due diligence as he or she feels is necessary to analyze and review all potential investments prior to making any investment decisions. The Producer does not and cannot investigate transactions by speakers, exhibitors or contributors or evaluate the merits of any dispute with a speaker, exhibitor, advertiser or contributor.** We suggest that if any dispute arises with an exhibitor, advertiser, speaker or contributor it should be pursued directly with the exhibitor, advertiser, speaker or contributor and if the situation warrants, use of any available remedy under appropriate law or regulations should be considered.

Notwithstanding the above, at this Event, through online sites associated with the Producer or through Membership Program resources, certain speakers' and/or companies' newsletters, magazines, books and other products or services may be advertised, promoted, and made available for purchase or trial. The materials promoted and made available for purchase or trial may or may not be authored by individuals or companies employed by or affiliated with the Producer or MoneyShow.com. In either case, the Producer or MoneyShow.com receives a commission only on sales of materials or services made available for purchase by and sold through the Producer, MoneyShow.com or the Producer's sales distribution partners.

The Producer strives to provide equal opportunity to all qualified persons to participate in these Events. To further that objective, the Producer will work to provide reasonable accommodations under the Americans with Disabilities Act for any person requesting accommodation, either in writing or by telephone, at least ten (10) working days prior to the first day of an Event. The Producer will make a reasonable effort to accommodate any request. However, due to the difficulty of providing some types of accommodations, the Producer cannot guarantee accommodation, especially late requests made without ten (10) working days' prior notice.

The risk of loss in electronic active trading or day trading can be substantial. You should, therefore, carefully consider whether such trading is suitable for you in light of your circumstances and financial resources. Attendees need to be wary of advertisements or other statements that emphasize the potential for large profits in active investing and day trading. Active investing and day trading can also lead to large and immediate financial losses.

The Producer reserves the right to use your likeness or photograph taken at the Event for its own promotional purposes.

All content/material presented at this Event or offered through a Membership Program is protected under U.S. and international copyright laws. By attending or becoming a Member, you agree not to copy, reproduce, record, video, photograph, upload, post, transmit, publish or distribute any material in any form, without the express written permission of the Producer. Exceptions are reserved only for members of the press with pre-approved press credentials from the Producer.

By attending the Event or participating in a Membership Program, you acknowledge that the Producer has a legitimate business interest in attracting exhibitors, speakers, media partners, sponsors, other attendees or contributors, and other participants (collectively "Participants") to the Event. Based on this, and as consideration for the Producer granting your request to participate at the Event or become a Member, you hereby agree that during the term of the Event or in a Membership Program, you will not distribute materials or solicit other Participants at the Event or in Member Programs in connection with any investment product or service, or any product, service or activity similar in nature to any product, service or activity promoted by or conducted by the Producer or by any Participants at the Event. The Producer reserves the right to revoke the registration of any prospective attendee determined to have previously engaged in disruptive or inappropriate behavior or to have violated other conditions for attendance at prior Producer events or in Membership Programs, and to eject, refuse entry or withdraw Membership privileges to any attendee or Member exhibiting similar behavior.

By inquiring about this Event or a Membership Program, you acknowledge that the Producer may contact you by phone, email or fax concerning future events and/or productions for up to three months after this inquiry. By attending the Event or a Membership Program, you acknowledge that the Producer has an "established business relationship" with you and therefore has the right to contact you by phone, email or fax concerning future events and/or productions for up to 18 months.

MoneyShow will use RFID technology to ascertain which programs attendees participate in. By attending a general session event and/or by entering a workshop room or stage presentation area you agree to have your contact details passed along to 3rd party presenters and companies who may pay to support your opportunity to participate in their event, as this constitutes an inquiry about those companies' products or services and an approval by you to receive future contacts from the company involved for up to three months. It also provides your consent to having your mailing and email address provided by the Event Producer to the 3rd party so they can send you information about their products or services. These rights are claimed by the Producer, notwithstanding that you may previously have elected to opt-in or opt-out of communications from the Event producer or other 3rd parties during your current or previous registrations. Except for the sharing contemplated by the preceding sentence, those earlier intentions will not be changed or affected by your acceptance of these terms.

Agreeing to be scanned in a workshop/presentation or exhibit booth, or agreeing to be added to a company's mailing list (through RFID technology or other means) at the Event constitutes an inquiry about that company's products or services and an approval by you to receive future contacts from the company involved for up to three months. It also provides your consent to having your mailing and email address provided by the Event Producer to that 3rd party so they can send you information about their products or services.

Paid Event Cancellation Policy: All cancellations must be received seven (7) days prior to event(s) for a partial refund, minus a cancellation fee. Cancellation fees will be \$50 for IMS events and All Stars of Options, and \$15 for all other paid events. No refunds or credits will be awarded for any reason after the first hour of a multi-hour event has passed, or where a meal is provided food has been consumed.

This notice and the respective obligations of the parties shall be interpreted in accordance with the laws of the State of Florida without regard to conflict of law provisions. Jurisdiction and exclusive venue for any disputes shall properly lie in a court of competent jurisdiction in Sarasota County in the State of Florida.
