

## WARRIOR GOLD Initiates Drilling at Goodfish Kirana Project

Toronto, March 14, 2019 – Warrior Gold Inc. (TSX-V - WAR) (“Warrior Gold” or the “Company”) is pleased to announce that drilling has commenced on the Goodfish Kirana Project in Kirkland Lake, Ontario. The property is situated approximately 6 km north of the Cadillac Larder Lake Fault Zone in Kirkland Lake (Figure 1), and hosts numerous gold showings, pits, shafts and several historical underground workings.

A 2,200 m diamond drill program of 14 holes has been designed to test four high-priority Zones which exhibit encouraging gold mineralization characteristic of Abitibi-type gold deposits: Goodfish A; Goodfish A-East; Goodfish C Zone and the Deloye Claims (Figure 2). Drilling has started on the Company’s Deloye patented claims.

**Figure 1:** Goodfish-Kirana property location and regional geologic setting.

### TARGET HIGHLIGHTS AND OBJECTIVES

#### A Zone

Is a high-grade gold target that is hosted in an east-southeast trending shear zone. This area contains the property’s most extensive historical underground development and past drilling. The majority of this drilling was conducted in the 1990s and the records are incomplete. Warrior’s drilling will test the extension of the mineralization along strike and dip of a historic drill intercept of 12.65 m @ 16.97 g/t Au (GF95-04).

#### C-Zone

Is a NE-trending shear zone which was insufficiently drill tested in the 1980s and 1990s. High-grade mineralization associated with the contact of quartz-feldspar porphyry and mafic volcanics, as well as high-grade grab samples indicate that the mineralization continues along strike. Magnetic signatures from the airborne survey suggest a possible association with an inferred cross-fault. Drilling will confirm historic grades and confirm the Zone’s continuity along strike and down-dip

### **Deloye Zone**

The Deloye Zone is interpreted to be an extension of the Kirana Deformation Zone which intersects the southern extension of the Goodfish Deformation Zone. The target area includes a 1930s shaft with high-grade gold in grab, drill core samples, and mapped quartz-feldspar porphyries. Drilling is designed to test the break below the historical Kirana Kirkland Mine underground workings, and the gold mineralization along deformed porphyry contacts.

### **A Zone-East**

The target is a shallow geophysical IP anomaly (chargeability/resistivity) coincident with an inferred cross-fault and fold hinge as identified in the airborne magnetics. Drilling is planned to test both the structure and the IP anomaly.

Danièle Spethmann, Warrior Gold CEO commented: “The results gained from this drill program will advance our understanding of both the geology and the mineralization potential of this very exciting property.”

### **About Warrior Gold Inc.**

Warrior Gold is a TSX-V listed Company and owns the Goodfish-Kirana Property located 5 km from the town of Kirkland Lake, Ontario. The Property is located in the historic Kirkland Lake Gold Camp which is situated in the prolific Abitibi Greenstone Belt, recognized as one of the world's highest grade greenstone belts with over 200 million ounces of gold produced to date.

## WARRIOR GOLD

EXPERIENCE • EXPLORATION • RESULTS

TSX-V:WAR

The Goodfish-Kirana Property is 11.5 km long by roughly 3 km wide (34 km<sup>2</sup>) and contains three major structural trends: the East-West trending Kirana Deformation Zone; the Northeast trending Goodfish Deformation Zone; and the Victoria Creek Deformation Zone on the recently acquired Sutton claims on the northeast side of the property. The Property contains numerous historical gold showings, as well as 18 historical pits and shafts.
